

BPW - Recommended times for warranty work to BPW trailer axles and Suspensions

RECOMMENDED TIMES

Page

Contents:

BPW trailer axles with disc brakes, series SH, SKH with ECO ^{Plus} / ECO hub system
BPW trailer axles with drum brakes,
series H, KH / KR, NH / NR with ECO ^{Plus} / ECO hub system
BPW trailer axles with drum brakes,
series H, KH / KR, NR with standard hub system
BPW self steering axles,
series H.LL, K.LL, N.LL
BPW air suspension,
series O, OM, OT / SLO, SLM, SLU / ALO, ALM, ALU
BPW mechanical suspensions,
series VA, VB, VG14-15

The recommended times for carrying out warranty work are summarised in this overview. All the following work times are stated in minutes and work time units respectively. e.g. 5 minutes (mins) = 1 work time unit (WTU)

1 work time unit (WTU) = 5 minutes (mins.)

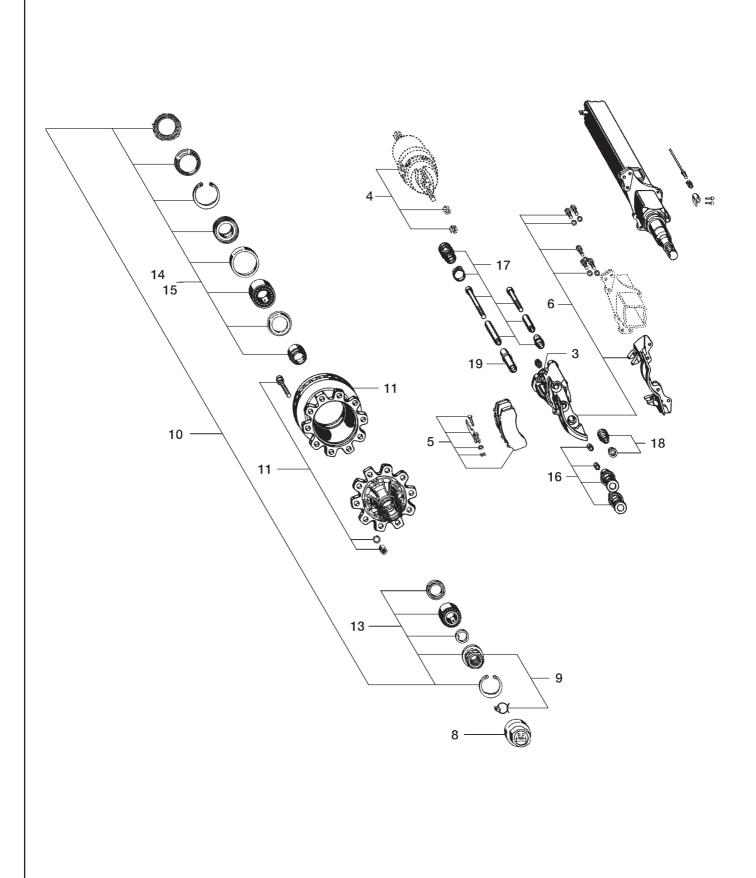

These recommedations have been determined in collaboration with BPW-affiliated workshops on the basis of average work times.

They are based on well equipped repair workshops, include all material and personal allocation times, and take safety regulations into consideration

BPW Bergische Achsen Kommanditgesellschaft recognises warranty work carried out within these recommended times.

If these time values should be exceeded additional justification will be required.

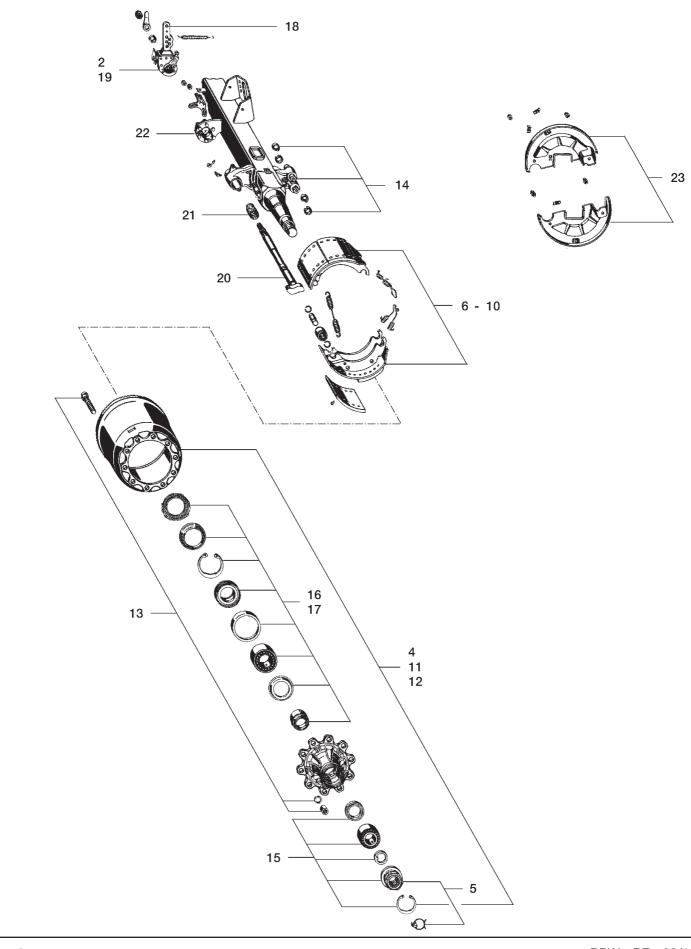

Please request BPW service booklets and BPW repair handbooks as required.

BPW trailer axles Series SH, SKH with ECO^{Plus} / ECO- hub system

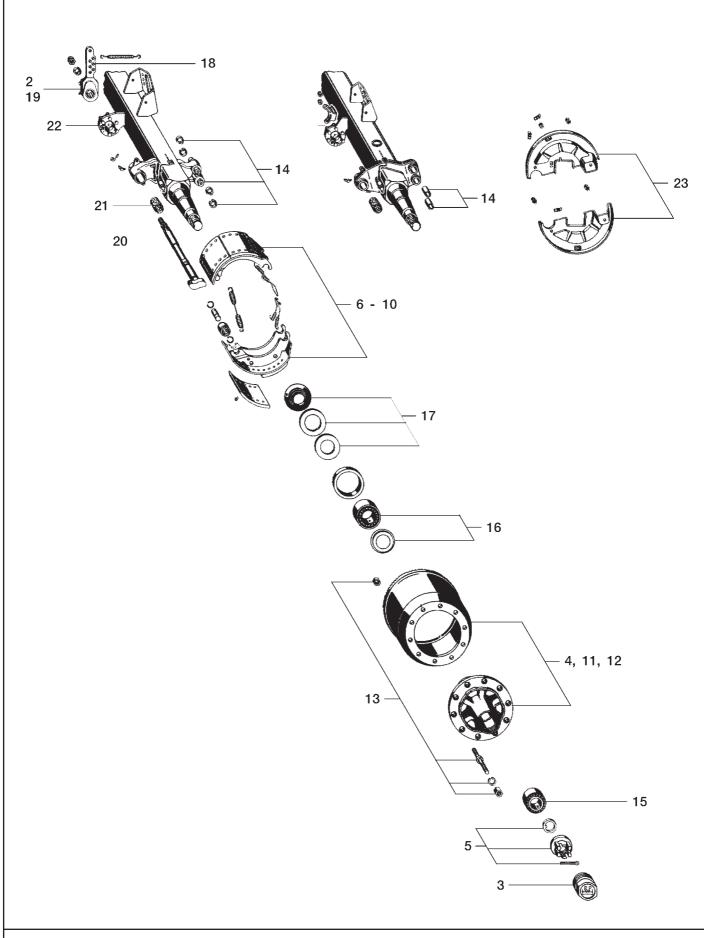

lt e iei			Prerequisite:		mended
Iten no.	Extent of work	Work item	work as per the consec. nos.	time Mins.	WTU
1	Set-up time for the vehicle	_	_	30,0	6,0
2	Wheel complete with tyre	remove and fit	—	10,0	2,0
3	Brakes on one wheel	adjust and secure	—	1,0	0,2
4	Brake cylinder	remove and fit		5,0	1,0
5	Brake lining	remove and fit	2, 3	5,0	1,0
6	Brake caliper carrier	remove and fit	2, 3, 4, 5	30	6,0
7	Brake caliper	operational check		1,0	0,2
8	One hub cap	remove and fit		2,0	0,4
9	Hub bearings on one wheel	adjust and secure	2, 3, 4, 5, 6, 8,	0,5	0,1
10	One hub with brake disc	remove and fit	2, 3, 4, 5, 6, 8, 9,	2,0	0,4
11	One brake disc	remove and fit	2, 3, 4, 5, 6, 8, 9, 10	25,0	5,0
12	Wheel studs on one wheel	remove and fit	2	20,0	4,0
13	One outer taper roller bearing cpl.	remove and fit	2, 3, 4, 5, 6, 8, 9, 10	7,5	1,5
14	One inner taper roller bearing cpl.	remove and fit	2, 3, 4, 5, 6, 8, 9, 10	10,0	2,0
15	Seal rings on one wheel	remove and fit	2, 3, 4, 5, 6, 8, 9, 10	2,5	0,5
16	Thrust pieces with bellow	remove and fit	2, 3, 4, 5, 6	25,0	5,0
17	Guide bush	remove and fit	2, 3, 4, 5, 6	20,0	4,0
18	Bellow (inner)	remove and fit	2, 3, 4, 5, 6, 17	10,0	2,0
19	Brass bushing	remove and fit	2, 3, 4, 5, 6	25,0	5,0

BPW trailer axles Series H, KH / KR, NH / NR with ECO^{Plus} / ECO- hub system

				Recommended	
lten no.	Extent of work	Work item	work as per the consec. nos.	time Mins.	WTU
1	Set-up time for the vehicle	_	_	30,0	6,0
2	Brakes on one wheel	adjust	_	1,0	0,2

			() = as required	* = Self stee	ering axle

BPW-Self steering axles Series H.LL, K.LL, N.LL

Item			Prerequisite: work as per	Recomm time	nended
Nr.	Extent of work	Work item	the consec. nos.	Mins.	WTU
1	Set-up time for the vehicle	_	_	30,0	6,0
2	Steering lock / Locking cylinder	remove and fit	—	20,0	4,0
3	Track rod end bearing without removing booster bracket with removing booster bracket	renew on one side		35,0 60,0	7,0 12,0
4	Steering rod without removing booster bracket with removing booster bracket	remove and fit	(5)	60,0 80,0	12,0 16,0
5	Steering damper	remove and fit	_	10,0	2,0
6	Self steering axle	remove and fit	—	150,0	30,0
7	Steering pivot on one side	renew bearing	6	170,0	34,0
8	Toe in	check and adjust	—	40,0	8,0
			() = as required		

For recommended times for removing / fitting brake and hub items see pages 5 / 7 / 9.

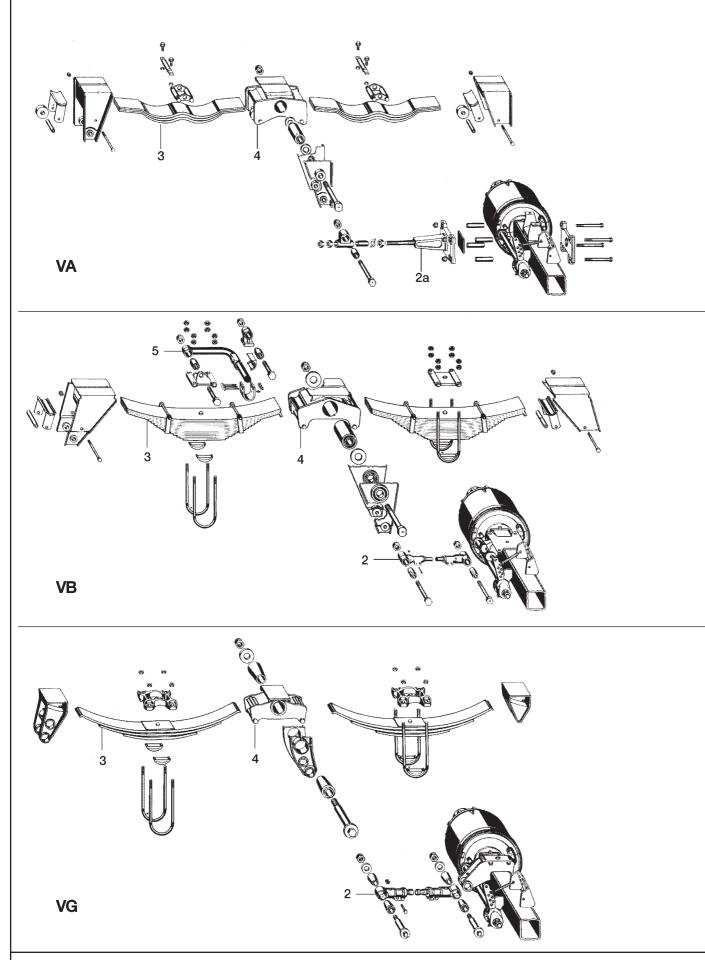

BPW Air suspension Series O, OM, OT / SLO, SLM, SLU / ALO, ALM, ALU

Iten	1		Prerequisite: work as per	Recomm time	nended
Nr.	Extent of work	Work item	the consec. nos.	Mins.	WTU
1	Set-up time for the vehicle	_	_	30,0	6,0
2	One air bag	remove and fit	—	40,0	8,0
3	One shock absorber	remove and fit	_	15,0	3,0
4	One trailing arm	remove and fit	_	90,0	18,0
5	One bushing for trailing arm	remove and fit	_	20,0	4,0
6	One check strap	remove and fit	_	20,0	4,0
7	One axle	remove and fit	_	150,0	30,0
8	Lift arm	remove and fit	_	60,0	12,0
9	Levelling valve	remove and fit	_	30,0	6,0
10	Air suspension circuit	adjustment	_	30,0	6,0
11	One axle alignment check under vehicle	measure and align	—	60,0	12,0

For recommended times for removing / fitting axle parts / self steering axle parts see pages 5 / 7 / 9 / 11.

BPW Mechanical suspensions Series VA, VB, VG

lten no.	ו Extent of work		Work item	Prerequisite: work as per the consec. nos.	Recomm time Mins.	nended WTU
	Cat up time for the	ve biele				
I	Set-up time for the v	venicie			30,0	6,0
2	VB / VG One connecting rod with bush change		remove and fit	_	60,0	12,0
2a	VA One connecting rod with bush change		remove and fit	—	90,0	18,0
3	One leaf spring	VB / VG VA	remove and fit	_	60,0 25,0	12,0 5,0
4	One equalizing bear with support and bu		remove and fit	_	180,0	36,0
5	One U-stabilizer bar with bush change		remove and fit	_	80,0	16,0
6	One axle		remove and fit	—	150,0	30,0
7	One axle alignment check und	der vehicle	measure and align	_	50,0	10,0

For recommended times for removing / fitting axle parts / self-steering axle parts see pages 5 / 7 / 9 / 11.
