FW3110 NoLube™
FIFTH WHEEL

Patented surface alloy on the kingpin contact surfaces of the lock jaws provides lubrication-free operation along with corrosion and wear resistance.

Lock system components are protected with a low friction coating which provides long wear life and corrosion protection.

The replaceable lube plate inserts are mechanically-bound to a unique "perforated" plate that provides friction-free performance and extends the life of the lube plate compound. The lube plates fit into cast recesses of the top plate and are secured by studs and locknuts.

Pocket inserts fit between the top plate and brackets to provide long lasting top plate articulation.

Infinite lock adjustment positions provide improved lock and kingpin durability.

The ergonomic release handle fully complies with the interlocking requirements of EC 94/20 and features Holland's easy to pull, one-handed operation "trigger lock".

Bracket pin design allows for easy top plate removal and installation, reducing maintenance time.

Available with the new lightweight bracket system, conventional ISO/DIN mounting brackets, weightsaver mount or sliding mounts.

Capacity:

- 65000 kg Gross Combination Weight
- 20000 kg vertical load
- 150 kN D-Value
- Top plate weight = 108 kg
- EC type approval pending

Warranty:

- 6 Years or 1000000 km Performance Guarantee

See FW3510/FW3410 European Commercial Fifth Wheel Warranty for details.
